Mint of the United States at Philadelphia,

MELTING AND REFINING DEPARTMENT,

Philadelphia, 12th. January, 1880.

Sir,

In my report to you of the 8th. December on the Sweep-processes of the N. Y. Assay Office, I mentioned an improvement in dry-sifting, which had suggested itself to me, as better, cheaper, and less dust-raising than the methods heretofore pursued in our sweep cellar. After discussing the best method of carrying out the object, with a Mr. Campbell, of the Mill firm of Kreider, Campbell & Co., I requested him to submit to you an estimate of the cost of such an arrangement. Sifting and sorting grains in a confined space, will relieve the whole Mint of a portion of the dust which fills its atmosphere.

Very Respectfully Yours

Jas. H. Booth

Assr.

Hon. A. Loudon Snowden

Superintendent.
